

Fuji Cervical Plate System

The Altus Spine **Fuji** Cervical Plate System combines class-leading features such as 28° screw angulation with a simplified instrument set to provide a versatile, easy-to-use stabilization system. The system's unique design provides dynamic compression capability intended to allow for controlled settling of the patient's anatomy.

T15 drive for both screws and blockers

Pre-lordosed anatomic fit

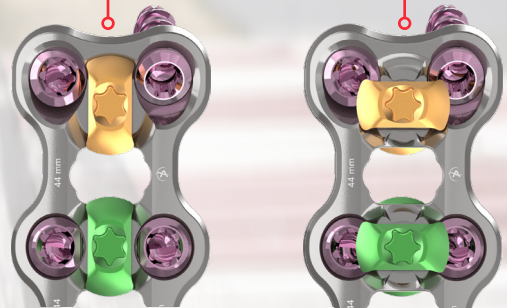

Dynamic compression geometry

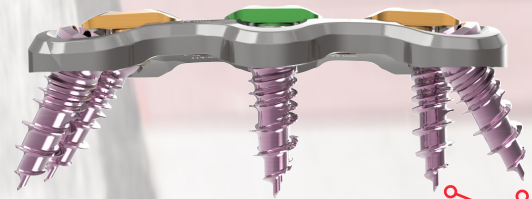

Visual and Tactile Verification Of Locking

Unlocked

Locked
