

BLACK · DIAMOND™

BY OSSEUS™

VERSATILE

Open, reduction, and percutaneous screw varieties in numerous size options offer versatility for use in a wide range of procedures and patient anatomies.

INTUITIVE

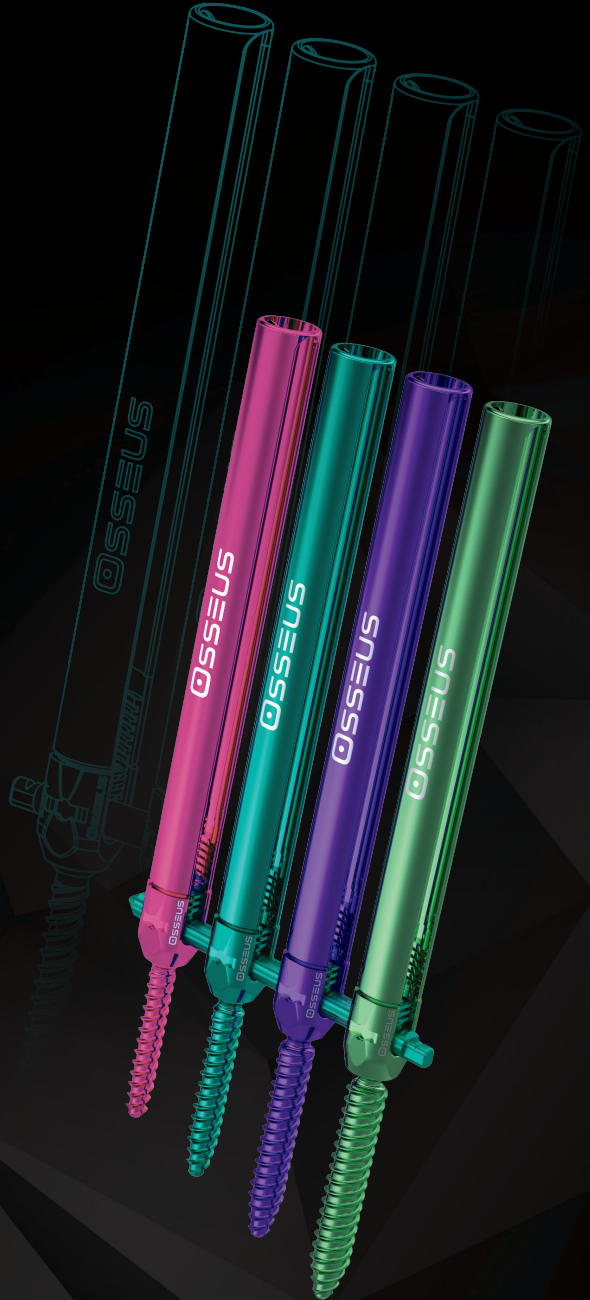

All system components designed to make each step of the procedure as straightforward and streamlined as possible.

LOW PROFILE

Implants and instrumentation designed to facilitate minimal tissue disruption.

ROBUST

Proven durability and rigid fixation under extreme conditions.

The Black Diamond Pedicle Screw System is a versatile thoracolumbar fixation system that is ideal for use in both minimally invasive and open procedures to treat a diverse array of pathologies. Vibrant colors make for simplified implant identification and in-situ visualization, while intuitive instrumentation optimizes each step of the procedure.
