NOT JUST ANOTHER POSTERIOR SIJ FUSION

The VYRSA™ Pro SI Fusion system utilizes a novel posterior auricular approach which allows for a more complete sacroiliac decortification, preparation and fusion bed with a low risk of neurostructural comorbidity.

- Direct access to the auricular surface.
- Greater surface contact across the joint.
- Large, easy-to-pack graft window
- 20, 25, 30 & 35mm implant options
