### The New Standard for Cervical Plates

The Ceres<sup>®</sup> ACP features a slim 2.0mm titanium plate intended for anterior screw fixation of the cervical spine as an adjunct to fusion. The plates are available in 1 to 4 levels from 12 to 84mm in length with varying screw types and lengths to adapt to surgeon needs. The streamlined instrumentation is also compatible with Amendia's other Ceres<sup>®</sup> Cervical Systems.

#### The Ceres<sup>®</sup> Anterior Cervical Plate System features:

- Ti-6Al-4V ELI construction (plates, screws, and cam locks)
- Quarter turn cam locks secure each individual screw
- Same 2.5mm hex driver is used for screws and cam locks

#### Plates:
