

▶ Zavation Cervical Plate System

▶ Standard & Midline Cervical Plate System Benefits and Features

- Low profile design
- Simple, visual, and tactile 1/4 turn locking of each screw using the same driver as used for inserting screws
- 8° caudal and cephalad biased angles
- ±10° variable angle (4.0mm screw)
- Screws available: variable, fixed, self-drilling, & self-tapping

▶ Standard

- Graft and endplate visualization, including partial view between screw holes
- 5° midline biased angle

Midline Cervical Plate

Standard Cervical Plate

Standard Cervical Plates	Lengths (end-hole to end-hole)	Width & Thickness
1-level	12 to 26 [2mm increments]	16mm wide 2mm thick
2-level	24 to 34 [2mm increments] 34 to 46 [3mm increments]	
3-level	39 to 69 [3mm increments]	
4-level	60 to 84 [4mm increments]	
Midline Plates		
1-level	12 to 26 [2mm increments]	10.5mm wide 2.3mm thick
2-level	24 to 34 [2mm increments] 34 to 46 [3mm increments]	
Screws	Diameter (mm)	Lengths
Standard	4.0, 4.5	12 to 20 [2mm increments]
Midline	4.0, 4.5, 5.0	12 to 18 [2mm increments]
