

AUDERE C CORPECTOMY PEEK Spacer Technology

FEATURES

- Large graft windows create maximum contact between graft and endplate
- Superior instrumentation for the most efficient application of implants
- Quick inserter prevents cage cross-threading and allows for easier implant insertion
- Parallel and lordotic designs for all anatomical needs
- Heights available up to 60 mm (a market exclusive), allowing for any and all complex procedures
- Strong, solid design for a more reliable implant
- Textured superior/inferior surfaces prevent expulsion in any direction
- Tantalum markers provide visual placement of implant
