

BLACKBIRD™  
HLS  
HINGED LAMINOPLASTY

# BLACKBIRD™ HLS

The ChoiceSpine BLACKBIRD™ Hinged Laminoplasty System (HLS) design eliminates fitting plates through trial and error bending, and allows the contralateral plate to be placed prior to elevating the lamina. The spacer is pre-tapped to provide a more secure plate connection over similar allograft, and the lamina contact ends are grit blasted for high performance grip. The BLACKBIRD HLS system provides a comprehensive, innovative solution to laminoplasty.

## System Features

### Plates

- Hinged Allograft Plate: 4-14 mm (2 mm inc)
- Hinged Hook and Kickstand Plate: 6-14 mm (2 mm inc)
- Hinged Plate: One Size
- Hinged Design to conform to exact anatomical geometry
- Hinge design fits range of laminar thicknesses

### Screws

- Ø2.4 mm Self-Drilling Screws: 4-12 mm (2 mm inc)
- Ø2.4 mm Self-Tapping Screws: 4-12 mm (2 mm inc)
- Ø2.8 mm Rescue Screws: 4-12 mm (2 mm inc)
- Screws thread lock to screw driver for secure implantation

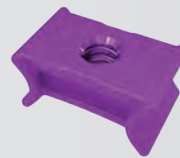

## Plates

Hinged Hinge Plate	
Part Number	Description
LT50-H002	Hinge Plate
Hinged Allograft Plate	
Part Number	Description
LT50-0104	Allograft Plate, 4 mm
LT50-0106	Allograft Plate, 6 mm
LT50-0108	Allograft Plate, 8 mm
LT50-0110	Allograft Plate, 10 mm
LT50-0112	Allograft Plate, 12 mm
LT50-0114	Allograft Plate, 14 mm
Hinged Hook and Kickstand	
Part Number	Description
LT50-0206	HK Plate, 6 mm
LT50-0208	HK Plate, 8 mm
LT50-0210	HK Plate, 10 mm
LT50-0212	HK Plate, 12 mm
LT50-0214	HK Plate, 14 mm

## Spacers

Ti-Spacer	
Part Number	Description
LT50-0304	Titanium Spacer, 4 mm
LT50-0306	Titanium Spacer, 6 mm
LT50-0308	Titanium Spacer, 8 mm
LT50-0310	Titanium Spacer, 10 mm
LT50-0312	Titanium Spacer, 12 mm
LT50-0314	Titanium Spacer, 14 mm

### Spacers/Graft Holders

- Titanium Spacer: 4-14 mm (2 mm inc)
- Tapped thread on spacer provides better lock to plate than similar allograft
- Grit blasted for high performance grip
