A Company of  
Naton Medical Group

# **TITAN™**

## **5.5mm Thoracolumbar Fixation System**

*Upgrade design*

*All-round guarantee*

 **NATON**

## Features:

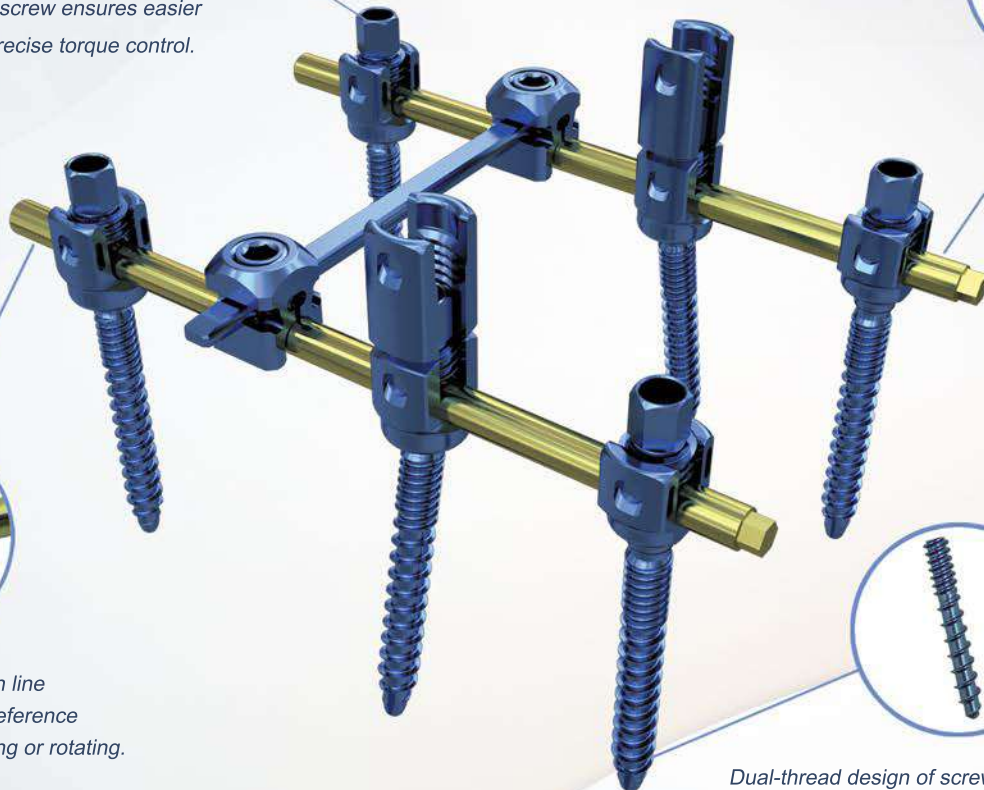

Break-off innie screw ensures easier insertion and precise torque control.

Reverse-angle thread locking mechanism of innie screw prevents screw tail expansion, and ensures security of final tightening.

Laser-marked indication line on the rod gives clear reference during in-situ rod bending or rotating.

Dual-thread design of screw shaft provides stronger fixation. Thread extends to screw tip, making bicortical fixation possible.

## Indications:

- ▶ Degenerative disc disease
- ▶ Spinal fractures
- ▶ Revision surgery
- ▶ Deformity
- ▶ Infections
- ▶ Tumors
