OVERVIEW

The 4CIS® Torrey Pines PEEK TLIF Cage is single component device used to restore height of disc space by Transforaminal approach and to facilitate lumbar interbody fusion with maintaining physiological lordotic angulation of lumbar spine. The vertical square teeth on the top and the bottom surface prevents subsidence of the cage into the vertebral body while they increase the anchoring and prevent slipping or expulsion. To make solid fusion of intervertebral body, hollow space in the implant allows bone graft material to be filled. The implant has safety proven structure and material (Polyetheretherketone, ASTM F2026) to promote biological synostosis and assures mechanical safety against load.

FEATURES & BENEFITS

Spacer
PEEK(ASTM F2026)

Marker
Tantalum(ASTM F560). The markers(\varnothing 0.8mm) allow implant recognition under fluoroscopy. Use markers to determine where the implant is located, how far it is margin and how rotated it is.

Lordotic angle
0°, 5°, 10°

Threaded hole
M3.

ORDERING INFORMATION

4CIS® TORREY PINES PEEK TLIF CAGE (NON-STERILIZED)
