BASIC CAGE®

FEATURES

The BASIC CAGE® PLIF System is indicated for the immobilization and stabilization of spinal segments as adjunct to fusion to be achieved in thoracic, lumbar and/or sacral spine. With the latest launch of the bullet-sharp cage, the overall performance has been greatly enhanced.

The optimized shape, as well as the angle of teeth on the two interfaces with endplates, achieved an ideal balance of enhanced usability and stability. The four titanium radiographic markers provide good visualization of the cage placement under radiographic control. The extensive product range of BASIC CAGE® PLIF ensures a full solution is ready at surgeons' disposal in answering all challenges.

FEATURES:

-  Classic and Bullet-Shape
-  Three angles 0°, 5° and 8°
-  Two lengths and two widths
-  Nine different heights from 7 mm - 15 mm
-  Easy-of-use instrumentation
