

Empowering
Partners with
Capacity for
Complexity

www.engmedsys.net

EMS develops medical devices with customers and is a full-service manufacturer – from prototype development to production.

- Founded in 2003 in Bartlett, Tennessee
- Main facility-100,000 square feet, 2nd facility-10,000 square feet, with 3rd-100,000 square feet facility coming soon
- ~400 employees, including many skilled machinists/tradesmen
- Expertise in many different types of metals, alloys, machined plastics, and rubber molding
- Supports many clinical segments: Spine, Robotic, Navigation, Ortho, Trauma, Extremities, etc.

A True Partner – Not Just a Supplier

EMS delivers best-in-class service that consistently exceeds the expectations of our OEM partners.

EMS has a long-term perspective and is willing to invest with their partners, with honest and transparent communication.

“ EMS is 100% differentiated in engineering support vs. competitors... They're the best I've ever seen. ”

– VP of Product Development

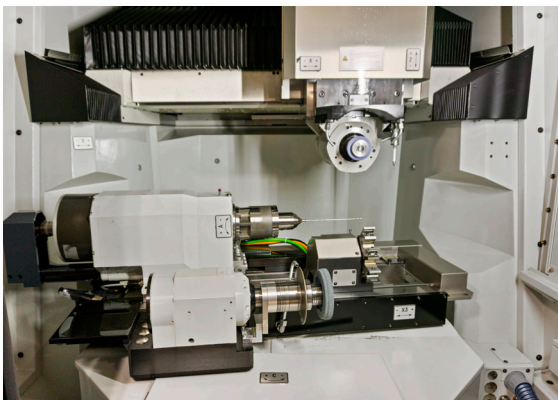

COMPLEXITY

Complexity is much more than precision.

EMS has a strong reputation for thriving with challenges – it's why we have **"CAPACITY FOR COMPLEXITY"**:

- Providing Design for Manufacturing (DFM) to solve design challenges in early concept development
- Innovating alongside Partners to introduce new materials and processes
- Navigating challenging timelines with EMS dashboards and digital tools
- Developing Initial Quality Plans (IQP) to align quality, expectations, gage development, and advanced inspection
- Navigating flexible capacity to support fluctuation of NPI and replenishment

ENGINEERING EXCELLENCE

1. ENGINEERED TEAMS

“ EMS’ staff are some of the best in the industry – a perfect 10. ”

– Senior Manager, Sourcing

2. ENGINEERED PROCESSES

- **EMS has the highest quality standards**
 - ISO 13485 certification
 - Validation Master Plan
 - Advanced inspection technology
- **EMS has competitive lead times**
 - Extensive New Product Introduction (NPI) processes and tools ensure effective delivery strategies - with accountability
- **EMS has advanced Operations Management**
 - Digital dashboards and machine monitoring for live scheduling job status offer Partners flexibility to shuffle priorities

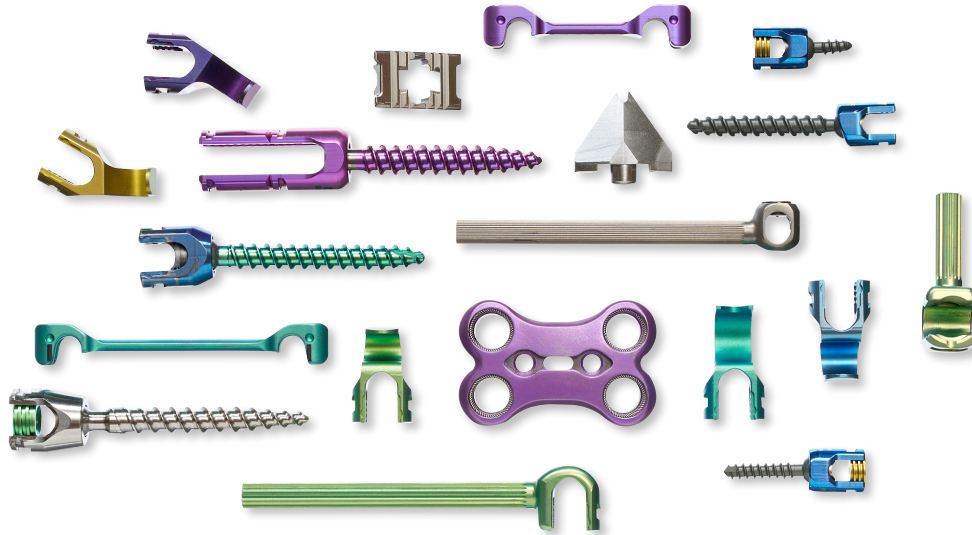

3. ENGINEERED RESOURCES

- Complex Milling – **60+** 4- and 5-axis assets
- Swiss Capability – **75+** multi-axis assets
- EDM Wire and Plunge – **20+** assets
- Multi-Axis Mill/Turn Machining – **30+** assets
- Robotic Multi-Axis Grinding
- Metal Finishing – automated technology and highly skilled technicians
- Automated Chemical Finishing – cleaning and passivation
- Rubber Molding and Handle Development – NEW
- Inventory Management and Kitting

BOTTOM LINE: EMS HAS THE CAPACITY YOU NEED

ENGINEERED MEDICAL SYSTEMS
