POSTERIOR FIXATION SYSTEM

The **RIVA Posterior Fixation System** is a next-generation pedicle screw system with a unique modular connection that allows for simplified intraoperative interchangeability. Multiple head and shank options are available to address the most complex surgical pathologies and implant constructs.

System Highlights:

- Versatile Modular Technology
- Interchangeable Head Connection
- Five Unique Head Options
- Strength Equivalent to Pre-assembled Screws
- Accepts 5.5mm and 6.0mm Rod
- Cortical Cancellous or Dual Lead Thread
- Solid, Fennestrated¹ or Cannulated Shanks
- Navigation Guided Instrumentation

¹FDA cleared for use with radiopaque dye.

SCREWS			HEADS		CONNECTORS	
	Cortical Cancellous Dual Lead		Standard		Rod-to-rod	
	Solid		Reduction - 15mm		Rod-to-rod, Offset	
	Fennestrated		Closed Top		Rod-to-rod, Double	
	Cannulated		Double Head Left		Open Lateral	
	Diameters: 4.5-12.5mm Lengths: 25-110mm		Double Head Right		Closed Lateral
